9696874922 | Noida, UP | [my-portfolio](#) | nishantdwivedi017@gmail.com | github.com/devNish017 | linkedin.com/in/nishantdwivedi017

Profile Summary

MCA graduate specializing in Full-Stack Development with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js). Strong foundation in Data Structures & Algorithms using C++. Skilled in building scalable web applications, RESTful APIs, and responsive user interfaces. Focused on writing clean, efficient code and solving real-world problems through practical projects.

Education

Master of Computer Application	2024 – 2026
Allenhouse Institute of Technology, Kanpur 8.3 CGPA	
Bachelor of Computer Application	2020 – 2023
Dr. Virendra Swaroop Institute of Computer Studies, Kanpur 7.1 CGPA	

Achievements

- Secured All India Rank 738 in CUET-PG 2024 for MCA admissions.
- Runner-up in Code Fusion, a competitive coding event held in college.

Skills

Programming Languages: C, C++, JavaScript, Python, HTML

Frontend: CSS, Tailwind CSS, React.js, Responsive Design, Zustand, Next.js, Prisma, Clerk

Backend & Database: Node.js, Express.js, TypeScript, RESTful APIs, Authentication (JWT), Authorization, MongoDB, Redis, Rate Limiting

Tools & Platforms: Git, GitHub, Vite, Render, Vercel, Postman

Projects

Snacksy – Full-Stack Restaurant Web Application with Next.js [GitHub](#)

- Developed a full-stack restaurant web application using Next.js, TypeScript, Tailwind CSS, and shadcn/ui, implementing App Router, React Server Components, and responsive UI across 10+ reusable components.
- Integrated Clerk authentication with conditional session-based rendering and built a dynamic testimonial carousel using Embla Carousel with autoplay and reusable star-rating logic.
- Engineered a validated menu-item creation workflow using Zod schema validation, Next.js Server Actions, and Prisma ORM, implementing structured field-level error handling with PostgreSQL persistence.
- Designed RESTful image-upload architecture using ImageKit and role-based admin authorization system to support secure CRUD operations on menu data.

Career Pilot – AI-Powered Resume & Placement Tracker [Live Link](#)

- Collaborated with a 4-member team to build a full-stack placement preparation platform with 8 integrated modules including ATS resume analysis, job matching, application tracking, and leaderboard ranking for 6+ users; led backend development.
- Engineered the backend ATS scoring engine using keyword extraction and rule-based skill matching across 7+ skill categories, detecting matched/missing keywords with 74.5% score accuracy.
- Implemented JWT authentication, RESTful APIs for resume upload, and server-side text extraction from PDF/DOCX files.

Secure Authentication REST API – Node.js, Express, Redis, MongoDB [GitHub](#)

- Engineered a secure, scalable REST API with JWT-based authentication, Access Token/Refresh Token rotation, and Redis-based token blacklisting for instant session invalidation on logout.
- Designed a Sliding Window Rate Limiting algorithm using Redis Sorted Sets to mitigate brute force and DDoS attacks, restricting requests to 5 per 60 seconds per IP.
- Built a secure middleware pipeline for route protection using JWT verification, cookie-based HTTP Only token storage, automated token refresh, and bcrypt password hashing with salt rounds.
